

App Permission Form

Student Name: _____ **Grade:** _____

School: Sandowne Elementary **Date:** September 2018-June 2019

Technology for School Use: Apps used while at school for educational purposes.

Reasons for Use:

This year we are going blended! That means we will be integrating technology into our daily learning. This will give your child the opportunity to work at their individual level and allow them to learn at their own pace. In order for your child to participate in this model of learning we will need your permission for them to use certain apps. Some of these apps collect educational data that informs my instruction and allows me to individualize student programs. Following FIPPA laws no personal student information (name) will be used on any of these apps. We will be assigning students a number or avatar and password that they will use to log in. Students will also be instructed not to provide any identifying information at ANY time.

Why the need for a permission slip?

As a BC teacher, I am subject to the BC Freedom of Information and protection of Privacy Act. In accordance with this Act, I must ensure that I protect the privacy of all students under my care. As such, I cannot use personal and identifiable information of a student (e.g., first name, last name, school, grade, teacher, class, etc.) including student work without written consent of the student's parent or guardian. Below are possible identifiable privacy risks and ways to minimize them. In the same way that you can request a child not participate in a field trip, you can opt out of these activities on behalf of your child and they will be provided alternative work with no impact on grading or assessment.

Acceptable Use & Privacy Risks:

- Students will be using their assigned number or avatar name and password, that may be used to identify who they are, to begin access into the app program
- Security on our classroom iPads is a high priority, especially when we have many students accessing them. A student must never allow others to use his/her provided username and password.
- Attempts to log on to the classroom iPads as a teacher/administrator will result in cancellation of user privileges.
- If you feel there has been a security breach by any user please notify the teacher immediately and do not try to deal with the problem yourself.
- Please read SD #72 district technology and acceptable use guidelines in the link below.
